EDITORIAL REVIEW

Experimental models for IgA-associated nephritis. *Abdalla Rifai* 1

LABORATORY INVESTIGATION

Intrarenal hemodynamic alterations induced by anti-GBM antibody. *Neil W. Boyce and Stephen R. Holdsworth* 8

Parathyroid response to aluminum in vitro: Ultrastructural changes and PTH release. *Agnes M. Bourdeau, Jean-Jacques Plachot, Giulia Cournot-Witmer, Alain Pointillart, Sonia Balsan, and Charles Sachs* 15

Glomerulonephritis induced in sheep by immunization with human glomerular basement membrane. *Per Bygren, Jörgen Wieslander, and Dick Heinegård* 25

Urinary excretion of neutral proteinases in nephrotic rats with a glomerular disease. *Jean-Claude Davin, Malcolm Davies, Jean-Michel Foidart, Jacqueline B. Foidart, Charles A. Dechenne, and Philippe R. Mahieu* 32

Verapamil protects against progression of experimental chronic renal failure. *David C.H. Harris, William S. Hammond, Thomas J. Burke, and Robert W. Schrier* 41

Strict metabolic control and renal function in the streptozotocin diabetic rat. *Peter K. Jensen, Jens S. Christiansen, Kenneth Steven, and Hans-Henrik Parving* 47

The anionic sites at luminal surface of peritubular capillaries in rats. *Valsala Koshy and Pratap S. Avasthi* 52

Aminoglycoside-induced alterations of phosphoinositide metabolism. *Pierre Marche, Béatrice Olier, Arlette Girard, Jean-Paul Fillastre, and Jean-Paul Morin* 59

The contribution of vascular obstruction to the functional defect that follows renal ischemia. *June Mason, Johanna Welsch, and Joachim Torhorst* 65

Spermine and spermidine are non-specific inhibitors of in vitro hematopoiesis. *Gerald M. Segal, Terri Stueve, and John W. Adamson* 72

Interaction of Tamm-Horsfall protein with bacterial extracts. *Mark S. Schachner, Peggy M. Miniter, Andrew R. Mayrer, and Vincent T. Andriole* 77

CLINICAL INVESTIGATION

Renal excretion and cyst accumulation of $\beta_2$microglobulin in polycystic kidney disease. *Nancy Birenboim, Vicki S. Donoso, Richard A. Huseman, and Jared J. Grantham* 85

Relation between renal calcium content and renal impairment in 246 human renal biopsies. *Luis F. Gimenez, Kim Solez, and W. Gordon Walker* 93

Androgen therapy in hemodialysis patients: I. Effects on red cell oxygen transport. *Ernesto D. Hendler and Lawrence Solomon* 100

Plasma and urinary catecholamines as related to renal function in man. *Kurt Laederach and Peter Weidmann* 107

Leukocyte C5a receptor modulation during hemodialysis. *Sharon L. Lewis, Dennis E. Van Epps, and Dennis E. Chenoweth* 112

Ontogenesis of 28 kDa vitamin D-induced calcium-binding protein in human kidney. *Françoise Mounier, Nicole Hinglais, Arlette Brehier, Monique Thomasset, Mireille Lacoste, Mireille Sich, and Marie-Claude Gubler* 121

Contents continued on next page

SYMPOSIUM ON THE URINARY CONCENTRATING MECHANISM IN HONOR OF ROBERT W. BERLINER

INTRODUCTION

Symposium introduction. *Christian de Rouffignac and Rex L. Jamison* 501

Tribute to Robert Berliner. *Rex L. Jamison* 502

History of the urinary concentrating mechanism. *Carl W. Gottschalk* 507

MOLECULAR MECHANISM OF ACTION OF ANTIDIURETIC HORMONE

Receptors to vasopressin and other hormones in the mammalian kidney. *François Morel, Martine Imbert-Teboul, and Danielle Chabardès* 512

Vasopressin signaling in kidney cells. *Dennis A. Ausiello, Karl L. Skorecki, Alan S. Verkman, and Joseph V. Bonventre* 521

Effects of antidiuretic hormone on the collecting duct. *Richard M. Hays, Nicholas Franki, and Guohua Ding* 530

INSIGHTS FROM THE STUDY OF THE STRUCTURE AND COMPOSITION OF THE RENAL MEDULLA

Cycles and separations: The histotopography of the urinary concentrating process. *Kevin V. Lemley and Wilhelm Kriz* 538

Functional adaptation of thick ascending limb and internephron heterogeneity to urine concentration. *Marie-Marcelle Trinh-Trang-Tan, Nadine Bouby, Wilhelm Kriz, and Lise Bankir* . 549

Composition of renal medullary tissue. *Ruth Ellen Bulger* 556

Osmotically active organic solutes in the renal inner medulla. *Robert S. Balaban and Maurice B. Burg* 562

FUNCTION OF THE RENAL TUBULE

Function of thin loops of Henle. *Masashi Imai, Junichi Taniguchi, and Kaoru Tabei* 565

The medullary thick limb: Function and modulation of the single-effect multiplier. *Steven C. Hebert, W. Brian Reeves, Donald A. Molony, and Thomas E. Andreoli* 580

The cortical thick ascending limb and early distal convoluted tubule in the urinary concentrating mechanism. *Ranier Greger and Heino Velázquez* 590

Short and long loop nephrons. *Rex L. Jamison* 597

The role of the collecting duct in urinary concentration. *Juha P. Kokko* 606

Physiological control of the urinary concentrating mechanism by peptide hormones. *Christian de Rouffignac, Jean-Marc Elalouf, and Nicole Roinel* 611

The renal pelvis. *Bodil Schmidt-Nielsen* 621

Pathways of urea transport in the mammalian kidney. *Mark A. Knepper and Françoise Roch-Ramel* 629

Contents continued on next page

RENAL CIRCULATION: EFFECT OF ARGININE VASOPRESSIN

GFR and the concentration of urine in the absence of vasopressin. Berliner-Davidson re-explored. *Heinz Valtin and Brian R. Edwards* 634

The medullary microcirculation. *Bernd L. Zimmerhackl, Channing R. Robertson, and Rex L. Jamison* 641

THEORY

Models of the urinary concentrating mechanism. *John L. Stephenson* 648

Models of the medullary microcirculation. *Elizabeth A. McNeely, Thomas L. Pallone, William M. Deen, and Channing R. Robertson* 662

Functional transitions in the renal countercurrent system. *Donald J. Marsh*..... 668

NEPHROLOGY FORUM

Microalbuminuria as a predictor of clinical diabetic nephropathy. *C. E. Mogensen* 673

INTERNATIONAL SOCIETY OF NEPHROLOGY

Meetings..... 690

Awards and Grants..... 692

EDITORIAL REVIEW

Potassium recycling. *Rex L. Jamison* 695

LABORATORY INVESTIGATION

Decreased ATPase activity in adriamycin nephrosis is independent of proteinuria. *Winston W. Bakker, Dharamdajal Kalicharan, Jan Donga, Caesar E. Hulstaert, and Machiel J. Hardonk* 704

Size restriction in the glomerular capillary wall: Importance of lamina densa. *Stephen R. Batsford, Rolf Rohrbach, and Arnold Vogt* 710

Glomerular hypertension and injury in desoxycorticosterone-salt rats on antihypertensive therapy. *Lance D. Dworkin, Helen D. Feiner, and Joseph Randazzo* 718

Effect of hemorrhagic reduction in blood pressure on recovery from acute renal failure. *Stephen P. Kelleher, John B. Robinette, Frederick Miller, and John D. Conger* 725

Maximum ultrafiltration rates during peritoneal dialysis in rats. *Thomas N. Levin, Lawrence B. Rigden, Laust H. Nielsen, Harold L. Moore, Zbylut J. Twardowski, Ramesh Khanna, and Karl D. Nolph* 731

Aluminum action on mouse bone cell metabolism and response to PTH and $1,25(OH)_2D_3$. *M. Lieberherr, B. Grosse, G. Cournot-Witmer, M.P.M. Hermann-Erlee, and S. Balsan* 736

Angiotensin I converting enzyme and kinin-hydrolyzing enzymes along the rabbit nephron. *Jeannine Marchetti, Suzanne Roseau, and François Alhenc-Gelas* 744

Reversing glomerular hypertension stabilizes established glomerular injury. *Timothy W. Meyer, Sharon Anderson, Helmut G. Rennke, and Barry M. Brenner* 752

Atrial natriuretic peptide in dehydrated Long-Evans rats and Brattleboro rats. *Kazuya Ogawa, Mark A. Henry, John Tange, Elizabeth A. Woodcock, and Colin I. Johnston* 760

The role of aluminum in the development of hypercalcemia in the rat. *Mariano Rodriguez, Arnold J. Felsenfeld, and Francisco Llach* 766

CLINICAL INVESTIGATION

Course and resolution of the coagulopathy in nephrotic children. *Norma Alkjaersig, Anthony P. Fletcher, Manoj Narayanan, and Alan M. Robson* 772

Fibrillary glomerulonephritis: An entity with unusual immunofluorescence features. *Charles E. Alpers, Helmut G. Rennke, James Hopper, Jr., and Claude G. Biava* 781

The existence of a protracted course in crescentic glomerulonephritis. *David S. Baldwin, Joel Neugarten, Helen D. Feiner, Melvin Gluck, and Bruce Spinowitz* 790

The effects of intraperitoneal calcitriol on calcium and parathyroid hormone. *James A. Delmez, C. Sue Dougan, Barbara K. Gearing, Marcos Rothstein, David W. Windus, Neville Rapp, and Eduardo Slatopolsky* 795

Identification of a target antigen in human anti-tubular basement membrane nephritis. *F. David Fliger, Jörgen Wieslander, Jan R. Brentjens, Giuseppe A. Andres, and Ralph J. Butkowski* 800

Blunted peripheral tissue responsiveness to thyroid hormone in uremic patients. *Victoria S. Lim, Donald C. Zavala, Michael J. Flanigan, and Richard M. Freeman* 808

Moderate sodium restriction in hypertensive subjects: Renal effects of ACE-inhibition. *Gerjan Navis, Paul E. de Jong, Ab J.M. Donker, Gjalt K. van der Hem, and Dick de Zeeuw* 815

Contents continued on next page

Complement membrane attack (MAC) in idiopathic IgA-glomerulonephritis. *Ernst W. Rauterberg, Hans-Michael Lieberknecht, Anne-Margret Wingen, and Eberhard Ritz* 820

Clinical correlation between hypercoagulability and thrombo-embolic phenomena. *Alain Robert, Michel Olmer, Jean Sampol, Jean-E Gugliotta, and Paul Casanova* 830

Effects of changing salt and water balance on renal kallikrein, kininogen and kinin. *Marc Weinberg, Steven Belknap, Wayne Trebbin, and Richard J. Solomon* 836

NEPHROLOGY FORUM

The interaction of parathyroid hormone and aluminum in renal osteodystrophy. *Eduardo Slatopolsky* 842

TECHNICAL NOTE

A rapid renal clearance methodology for dextran. *John K. Leypoldt, Ronald P. Frigon, Karl W. DeVore, and Lee W. Henderson* 855

EDITORIAL REVIEW

The erythrocyte–immune complex–glomerulonephritis connection in man. *Lee A. Hebert and Fernando G. Cosio* 877

LABORATORY INVESTIGATION

Lysosomes of the renal cortex: Heterogeneity and role in protein handling. *Knut–Jan Andersen, Hans–Jacob Haga, and Miloslav Dobrota* 886

Evidence against increased glomerular pressure initiating diabetic nephropathy. *Norman Bank, Ruth Klose, Hagop S. Aynedjian, Dang Nguyen, and Leonarda B. Sablay* 897

Mechanism of decreased vascular response to angiotensin II in renal vascular hypertension. *Robert G. Benedetti and Stuart L. Linas* 906

Parathyroid hormone–stimulated calcium absorption in cTAL from vitamin D-deficient rabbits. *James E. Bourdeau, Craig B. Langman, and Roger Bouillon, with the technical assistance of Ann L. Theisen* 913

Effects of hydrochlorothiazide on Na-K-ATPase activity along the rat nephron. *Lal C. Garg and Neelam Narang* 918

Thyroparathyroidectomy modifies the skeletal response to aluminum loading in the rat. *William G. Goodman with the technical assistance of Jeanenne M. Gilligan* 923

Generation of pH gradient across the rabbit collecting duct segments perfused in vitro. *Kenichi Ishibashi, Sei Sasaki, Naoki Yoshiyama, Tatsuo Shiigai, and Jugoro Takeuchi* 930

Effect of biological activity of PTH on its peripheral metabolism in the rat. *Kevin J. Martin, Jane Lewis Finch, Keith Hruska, and Eduardo Slatopolsky* 937

Response of isolated Dahl rat kidney to calcium antagonists. *Thomas H. Steele and Laura Challoner–Hue* 941

Comparative effect of ANF and various diuretics on isolated nephron segments. *Patrick Vinay, Catherine Manillier, Laurent Lalonde, Gaetan Thibault, Yzan Boulanger, Andre Gougoux, and Marc Cantin* 946

CLINICAL INVESTIGATION

Potassium and norepinephrine– or angiotensin–mediated pressor control in pre-hypertension. *Mario G. Bianchetti, Peter Weidmann, Carlo Beretta-Piccoli, and Claudia Ferrier* 956

Leukocyte analysis using monoclonal antibodies in human glomerulonephritis. *David H. Hooke, David C. Gee, and Robert C. Atkins* 964

Uremic cardiomyopathy: An inadequate left ventricular hypertrophy. *Gérard M. London, Françoise Fabiani, Sylvain J. Marchais, Marie–Christine de Vernejoul, Alain P. Guerin, Michel E. Safar, Fabien Metivier, and Francisco Llach* 973

Renal transplantation after prolonged dwell peritoneal dialysis in children. *Maricarmen Malagon and Ronald J. Hogg* 981

Efficacy of intramuscular and intraperitoneal deferoxamine for aluminum chelation. *Bruce A. Molitoris, Patricia S. Alfrey, Nancy L. Miller, James A. Hasbargen, William D. Kaehney, Allen C. Alfrey, and Barbara J. Smith* 986

Contents continued on next page

Influence of a low sodium diet on the renal response to amino acid infusions in humans. *Luis M. Ruilope, Jose Rodicio, Rafael Garcia Robles, Jose Sancho, Blanca Miranda, Joey P. Granger, and J. Carlos Romero* 992

Autosomal dominant polycystic kidney disease in childhood: A longitudinal study. *Aileen Sedman, Patricia Bell, Michael Manco–Johnson, Robert Schrier, Bradley A. Warady, Edward O. Heard, Nancy Butler–Simon, and Patricia Gabow* 1000

Schistosomal specific nephropathy leading to end–stage renal failure. *Mohamed A. Sobh, Fatma E. Moustafa, F. El-Housseini, Magdy T. Basta, Andre M. Deelder, and Mohamed A. Ghoniem* 1006

Glomerular response mechanisms to glycemic changes in insulin–dependent diabetics. *Martin J. Wiseman, Ruggero Mangili, Miriam Alberetto, Harry Keen, and Giancarlo Viberti* 1012

Complement activation in IgA nephropathy. *Robert J. Wyatt, Yoshiharu Kanayama, Bruce A. Julian, Nobuo Negoro, Sandra Sugimoto, Edmund C. Hudson, and John G. Curd* 1019

NEPHROLOGY FORUM

Hypertension in renal transplant recipients. *Robert G. Luke* 1024

TECHNICAL NOTE

Measurement of renal blood flow by cine computed tomography. *Werner Jaschke, Martin G. Cogan, Richard Sievers, Robert Gould, and Martin J. Lipton* 1038

ABSTRACTS

EDITORIAL REVIEW

Role of K^+ conductive pathways in the nephron. *Rainer Greger and Heinz Gögelein* 1055

LABORATORY INVESTIGATION

The cAMP system in vasopressin–sensitive nephron segments of the vitamin D-treated rat. *Tomas Berl* 1065

The role of thromboxane in cuprophan–induced pulmonary hypertension. *Alfred K. Cheung, Robert L. Baranowski, and Andrea L. Wayman* 1072

Intercalated cells of the rat inner medullary collecting duct. *William L. Clapp, Kirsten M. Madsen, Jill W. Verlander, and C. Craig Tisher* 1080

Polycystic kidney and liver disease and corticosterone changes in the *cpk* mouse. *John F.S. Crocker, Stan R. Blecher, Morris L. Givner, and Susanna C. McCarthy* 1088

Augmentation by aprotinin of the renal response to vasopressin. *Michael L. Kauker, Philip G. Baer, and Alberto Nasjletti*..... 1092

Mechanism of attenuated hydrochlorothiazide response during indomethacin administration. *Kent A. Kirchner, Steven Brandon, Rebecca A. Mueller, Manis J. Smith, and John D. Bower*... 1097

Expression of the α-subunit of Na/K-ATPase in renal collecting duct epithelium during development. *Will W. Minuth, Peter Gross, Peter Gilbert, and Michael Kashgarian*..... 1104

Cytoplasmic pH regulation in canine renal proximal tubule cells. *Ian R. Reid, Roberto Civitelli, Scott L. Westbrook, Louis V. Avioli, and Keith A. Hruska*..... 1113

Effects of amiloride in the medullary collecting duct of rat kidney. *Harald Sonnenberg, Ursula Honrath, and Douglas R. Wilson* 1121

Enhanced glomerular prostaglandin formation in experimental membranous nephropathy. *Rolf A.K. Stahl, Stephen Adler, Particia J. Baker, Yi Pu Chen, Pamela M. Pritzl, and William G. Couser*..... 1126

CLINICAL INVESTIGATION

Anti-α-galactosyl antibodies and immune complexes in children with Henoch–Schönlein purpura or IgA nephropathy. *Jean–Claude Davin, Michel Malaise, Jacqueline Foidart, and Philippe Mahieu* 1132

Renal magnesium wasting in two families with autosomal dominant inheritance. *Wil B. Geven, Leo A. Monnens, Hans L. Willems, Will C. Buijs, and Ben G. ter Haar*..... 1140

Cyst formation and growth in autosomal dominant polycystic kidney disease. *Jared J. Grantham, James L. Geiser, and Andrew P. Evan* 1145

Relationship between vascular disease and age–associated changes in the human kidney. *Bertram L. Kasiske* 1153

Intraglomerular T cells and monocytes in nephritis: Study with monoclonal antibodies. *Fernando E.B. Nolasco, John Stewart Cameron, Barrie Hartley, Adolfo Coelho, Gillian Hildreth, and Rowena Reuben* 1160

AIDS-related glomerulopathy: Occurrence in specific risk groups. *Victoriano Pardo, Ruth Meneses, Luis Ossa, David J. Jaffe, Jose Strauss, David Roth, and Jacques J. Bourgoignie* 1167

Contents continued on next page

Renal mass and reserve of vitamin D: Determinants in primary hyperparathyroidism. *Pascal Patron, Jean-Paul Gardin, and Michel Paillard* 1174

Renal handling of calcium in the early newborn period. *Sharon R. Siegel and Anthony Hadeed* 1181

Normal human serum also contains the lymphotoxin found in minimal change nephropathy. *Napier M. Thomson and Norbert Kraft* 1186

Acetate metabolism and bicarbonate generation during hemodialysis: 10 years of observation. *Patrick Vinay, Michel Prud'homme, Bernard Vinet, Ginette Cournoyer, Patrice Degoulet, Michel Leveille, Andrè Gougoux, Gilles St-Louis, Louis Lapierre, and Yves Piette* 1194

Erythropoietin–hematocrit feedback circuit in the anemia of end–stage renal disease. *Alexander J. Walle, George Y. Wong, Gisela K. Clemons, Joseph F. Garcia, and Walter Niedermayer* .. 1205

Repeated low–dose streptokinase infusions into occluded permanent, central–venous hemodialysis catheters. *Robert A. Welik, John Josselson, Steve Y. Shen, William R. Reed, and John H. Sadler* .. 1210

NEPHROLOGY FORUM

Mechanisms of glucocorticoid-induced hypertension. *Judith A. Whitworth* 1213

TECHNICAL NOTE

Picomole analysis of alkali metals by flameless atomic absorption spectrophotometry. *Charles S. Wingo, Geraldine B. Bixler, Chan Hyung Park, and Scott G. Straub* 1225

INTERNATIONAL SOCIETY OF NEPHROLOGY

Meetings 1229

Awards and Grants 1232

KIDNEY INTERNATIONAL

Volume 31, Supplement 20

Angiotensin, ACE Inhibition and the Kidney
Venice, Italy, September 1985

Table of contents

Introduction. *J.G.G. Ledingham* S-1

ANATOMY

Overview: Anatomy. *Jöel Ménard* S-2

Intrarenal and intracellular distribution of renin and angiotensin. *Eberhard Hackenthal, Renate Metz, Christian P. Bührle, and Roland Taugner* S-4

Morphological aspects of renin synthesis, processing, storage, and secretion. *George B. M. Lindop* S-18

Heterogeneity of nephron anatomy. *Lise Bankir, Nadine Bouby, and Marie-Marcelle Trinh-Trang-Tan* S-25

Localization of angiotensin II receptors in rat and monkey kidney by in vitro autoradiography. *Frederick A. O. Mendelsohn, Monica Millan, Remi Quirion, Greti Aguilera, Sheung-To Chou, and Kevin J. Catt* S-40

Human renal angiotensin I converting enzyme and neutral endopeptidase. *Randal A. Skidgel, Werner W. Schulz, Lei-Ting Tam, and Ervin G. Erdös* S-45

PHYSIOLOGY, PART 1

Overview: Physiology I. *J.G.G. Ledingham* S-49

A periarterial pathway for intrarenal distribution of renin. *Wilhelm Kriz* S-51

The renin-angiotensin system and nephron function heterogeneity. *Albert Mimran and Daniel Casellas* S-57

Acute and chronic effects of angiotensin II on the vessels of the split hydronephrotic kidney. *M. Steinhausen, R. B. Sterzel, J. T. Fleming, R. Kühn and S. Weis* S-64

The effects of angiotensin II on isolated glomeruli and cultured glomerular cells. *Raymond Ardaillou, Josée Sraer, Dominique Chansel, Nicole Ardaillou, and Jean-Daniel Sraer* S-74

The tubular effects of angiotensin II. *L. Gabriel Navar, Pamela K. Carmines, Wann-Chu Huang, and Kenneth D. Mitchell* S-81

PHYSIOLOGY, PART 2

Control of renal renin release. *Andrea Stella and Alberto Zanchetti* S-89

Prostaglandins modulate the glomerular actions of angiotensin II. *Michael J. Dunn and Linda A. Scharschmidt* S-95

RENAL DISEASE AND ACE INHIBITION, PART 1

Overview: Angiotensin converting enzyme inhibition and renal disease. *J. D. Swales* S-102

Angiotensin converting enzyme inhibition and the normal kidney. *H. R. Brunner, B. Waeber and J. Nussberger* S-104

Effect of angiotensin II on glomerular hemodynamics and ultrafiltration coefficient. *Roland C. Blantz and Francis B. Gabbai* S-108

Effects of angiotensin II and of angiotensin converting enzyme inhibition in chronic renal failure. *J.G.G. Ledingham* S-112

Contents continued on next page

Disposition of enalapril and enalaprilat in renal insufficiency. *Richard J. Fruncillo, Mario L. Rocci, Jr., Peter H. Vlasses, Parviz Mojaverian, Kenneth Shepley, Regina A. Clementi, Arie Oren, Ronald D. Smith, Alice E. Till, Louis J. Riley, Jr., Golpal Krishna, Robert G. Narins, and Roger K. Ferguson* S-117

Lowering of arterial blood pressure limits glomerular sclerosis in rats with renal ablation and in experimental diabetes. *Roberto Zatz, Sharon Anderson, Timothy W. Meyer, B. Rentz Dunn, Helmut G. Rennke, and Barry M. Brenner* S-123

RENAL DISEASE AND ACE INHIBITION, PART 2

Overview: Renal disease and ACE inhibition: II. *J. I. S. Robertson* S-130

Nephrotoxicity of angiotensin converting enzyme inhibition. *Ab J. M. Donker* S-132

Glomerular abnormalities in patients receiving angiotensin converting enzyme inhibitor therapy. *Edmund J. Lewis* S-138

Angiotensin converting enzyme inhibition and acute tubular necrosis. *Thomas J. Burke and Robert W. Schrier* S-143

Renal effects of enalapril in dogs. *James S. MacDonald, Walter J. Bagdon, Chennekatu P. Peter, Joseph F. Sina, Richard T. Robertson, Edgar H. Ulm, and Delwin L. Bokelman* S-148

RENAL ARTERY STENOSIS

Overview: Angiotensin converting enzyme inhibition in renovascular hypertension. *Colin I. Johnston and Bruce Jackson* S-154

Intrarenal effects of angiotensin II in renal artery stenosis. *Warwick P. Anderson and Robyn L. Woods* S-157

Renal damage induced in the clipped kidney of one-clip, two-kidney hypertensive rats during normalization of blood pressure by converting enzyme inhibition. *Jean-Baptiste Michel, Jean-Claude Dussaule, Laurence Choudat, Dominique Nochy, Pierre Corvol, and Jöel Ménard* ... S-168

Effects on angiotensin-converting enzyme inhibition on renal hemodynamics in renal artery stenosis. *David J. Levenson and Victor J. Dzau* S-173

Risks of angiotensin converting enzyme inhibition in renal artery stenosis. *Gert J. Wenting, Frans H. M. Derkx, Lies H. Tan-Tjiong, Andries J. van Seyen, Arie J. Man in't Veld, and Maarten A. D. H. Schalekamp* S-180

Transrenal changes in active and inactive renin and angiotensin II in renal artery stenosis: Effects of converting enzyme inhibition. *D. M. Tillman, L. S. Malatino, A. F. Lever, and J. I. S. Robertson* .. S-184

ESSENTIAL HYPERTENSION

Renal α_2-adrenoceptors as potential targets for converting enzyme inhibitors. *William A. Pettinger, William B. Jeffries, and Lei-Ting Tam* S-191

A comparison of the effects of angiotensin II and norepinephrine on intrarenal arteries in the rat. *Stephen K. Wilson* S-193

HEART FAILURE

Overview: Angiotensin, angiotensin converting enzyme inhibition, and the kidney—Congestive heart failure. *M. Gary Nicholls* S-200

Renin-angiotensin system and renal circulation in clinical congestive heart failure. *Victor J. Dzau* . S-203

Experimental models of heart failure: Implications for renin and the kidney. *Günter A. J. Riegger* . S-210

Role of angiotensin II in the altered renal function of heart failure. *Iekuni Ichikawa, Valentina Kon, Marc A. Pfeffer, Janice M. Pfeffer, and Barry M. Brenner* S-213

Converting enzyme inhibitors and renal function in cardiac failure. *J. I. S. Robertson and A. M. Richards* S-216

Heart failure, renal function, and angiotensin converting enzyme inhibitors. *John G. F. Cleland and Henry J. Dargie* S-220

CONCLUSION

Effects of preglomerular and postglomerular vascular resistence alterations on filtration fraction. *Pamela K. Carmines, Mark D. Perry, Jane B. Hazelrig and L. Gabriel Navar* S-229

Concluding remarks. *J. I. S. Robertson* S-233

Acquired resistance to acute renal failure. *Nishio Honda, Akira Hishida, Katsuhito Ikuma, and Katsuhiko Yonemura* 1233

LABORATORY INVESTIGATION

Change in energy reserves in different segments of the nephron during brief ischemia. *Jean Bastin, Natalie Cambon, Martha Thompson, Oliver H. Lowry, and Helen B. Burch* 1239

Platelet activating factor (PAF) as a mediator of injury in nephrotoxic nephritis. *Tullio Bertani, Manuela Livio, Daniela Macconi, Marina Morigi, Giovanna Bisogno, Carlo Patrono, and Giuseppe Remuzzi* 1248

Glomerular sieving of high molecular weight proteins in proteinuric rats. *John A. Bertolatus, Maher Abuyousef, and Lawrence G. Hunsicker* 1257

An evaluation of the development of experimental membranous nephropathy. *Francis B. Gabbai, Leslie C. Gushwa, Curtis B. Wilson, and Roland C. Blantz* 1267

Effect of acetazolamide on renal metabolism and ammoniagenesis in the dog. *André Gougoux, Patrick Vinay, Lorraine Zizian, Alberto Tejedor, and Josette Noel* 1279

Interlobular arterial resistance: Influence of renal arterial pressure and angiotensin II. *Karin J. Heyeraas and Knut Aukland* 1291

Status of glomerular proteoglycans in aminonucleoside nephrosis. *Brigitte Lelongt, Hirofumi Makino, and Yashpal S. Kanwar* 1299

Renal target structures in acute allograft rejection: A histochemical study. *Dariusz Leszczynski, Maria Laszczynska, Jorma Halttunen, and Pekka Häyry* 1311

Immune complex effects on glomerular eicosanoid production and renal hemodynamics. *Mohamed A. Rahman, Steven N. Emancipator, and Michael J. Dunn* 1317

Evidence for a stimulatory effect of high potassium diet on renal kallikrein. *Carlos P. Vío and Carlos D. Figueroa* 1327

Indomethacin reduces proteinuria in passive Heymann nephritis in rats. *Carla Zoja, Ariela Benigni, Pierre Verroust, Pierre Ronco, Tullio Bertani, and Giuseppe Remuzzi* 1335

CLINICAL INVESTIGATION

Bone histologic response to deferoxamine in aluminum–related bone disease. *Dennis L. Andress, Henry G. Nebeker, Susan M. Ott, David B. Endres, Allen C. Alfrey, Eduardo A. Slatopolsky, Jack W. Coburn, and Donald J. Sherrard* 1244

Heparin free dialysis: Comparative data and results in high risk patients. *Ralph J. Caruana, Rasib M. Raja, Jasmine V. Bush, Mark S. Kramer, and Stephen J. Goldstein* 1351

Dietary NaCl determines severity of potassium depletion–induced metabolic alkalosis. *Rosemary E. Hernandez, Morris Schambelan, Martin G. Cogan, Joan Colman, R. Curtis Morris, Jr., and Anthony Sebastian* 1356

Albumin synthesis, albuminuria and hyperlipemia in nephrotic patients. *George A. Kaysen, John Gambertoglio, James Felts, and Florence N. Hutchison* 1368

Contents continued on next page

Mechanism of enhanced transcellular potassium–secretion in man with chronic renal failure. *Sergio Panese, Rodolfo S. Mártin, Mirta Virginillo, Maria Litardo, Esteban Siga, Elvira Arrizurieta, and John P. Hayslett* 1377

Blood pressure determinants in living–related renal allograft donors and their recipients. *Vicente E. Torres, Kenneth P. Offord, Carl F. Anderson, Jorge A. Velosa, Peter P. Frohnert, James V. Donadio, Jr., and David M. Wilson* 1383

Atrial natriuretic peptide and other vasoactive hormones in nephrotic syndrome. *Tivadar Tulassay, Wolfgang Rascher, Rudolf E. Lang, Hannsjörg W. Seyberth, and Karl Schärer*..... 1391

Decreased sensitivity to heparin in vitro in steroid–responsive nephrotic syndrome. *Christiane G. Vermylen, Michael Levin, John G. Lanham, Roger M. Hardisty, and T. Martin Barratt* ... 1396

NEPHROLOGY FORUM

Renal and circulatory mechanisms in congestive heart failure. *Victor J. Dzau*..... 1402

ABSTRACTS

Société de Néphrologie, Italian Society of Nephrology and Spanish Society of Nephrology . 1416

INTERNATIONAL SOCIETY OF NEPHROLOGY

Meetings..... 1420

Awards and Grants..... 1422

REFEREES 1424

INDEXES TO VOLUME 31
